

GLOBEX[®]

EVACUATION SOLUTIONS

Established 2010

RAISING AWARENESS - IMPROVING STANDARDS

COULD YOU EVACUATE
EVERYONE FROM YOUR BUILDING **IN THE EVENT**
OF AN EMERGENCY WITHOUT DEPENDING
ON THE FIRE SERVICE ?

There is a common misunderstanding that it is the responsibility of the emergency services to ensure everyone evacuates from a building safely, it is not !

There is a legal requirement for employers and service providers to ensure the safe evacuation of mobility impaired persons in the event of an emergency.

We provide cost effective methods of ensuring the safe evacuation of non-ambulant persons from the upper or lower levels of buildings in the event of an emergency or when lifts can not be used due to maintenance or a power failure.

Our aim is to raise awareness and provide professional market leading products and support services to assist clients to maintain compliance with statutory obligations and provide peace of mind.

GLOBEX is a market leading brand recognised internationally for quality and an ISO 9001 certificated company. Equipment carries the CE mark and some models are also approved by TUV NORD, an independent test house.

- Integrated foot pocket to hold the patient safely and securely in place
- Tough slippery coated underside to assist transfer over floor surfaces and stairs
- Maximum capacity 150kg

Simply owning equipment does not mean compliance, it is essential there are suitable and sufficient procedures in place, trained operators and equipment is maintained.

Our certificated trainer and operator training courses provide attendees with the necessary knowledge and ability to operate evacuation equipment correctly.

We also provide speakers at seminars /event to raise awareness of the need for safe evacuation for all users of buildings.

To ensure clients meet the requirements of Provision and Use of Work Equipment Regulations 1998, PUWER, we provide certificated maintenance checks of all types and makes of evacuation equipment.

Our compliance packages provide peace of mind that clients are meeting their statutory obligations at discounted fixed prices for 3-5 years, this package also adds additional years to our 5-year warranty on all our evacuation chairs.

If you need to protect your evacuation equipment from theft battery operated anti-theft alarms are available

To complement our range of evacuation equipment we also supply a range of lightweight ramps that are quick and easy for deployment to assist with providing access and egress for doorways and steps.
